■ Douglas Wright, follower of Chelsea and a natural resources fan, bought an overhang of 5m shares in AIM-listed TomCo Energy at 2p a share from PSG Solutions. It helped the former ~~Netcentric~~ cash shell improve 0.125p to 2.45p ahead of Wednesday's agm, which will be followed by a presentation to Irish investors in Dublin on Thursday. The company is run by Howard Crosby and John Ryan, who have superb track records in the US mining sector.
